Summary

A methodical thinker who has a strong grasp on logical thinking and processes. Able to maintain a calm and collected demeanor in high stress situations.

Experience

Programmer/Operator

BenCo Technology, LLC

Apr 2018 - Present (6 years 1 month)

Responsible for helping provide our customers with the highest degree of precision that are within our machines capabilities and maintaining the quality that is nothing less than perfection. Scheduling and managing the work flow for our operators to meet customer deadlines, while allowing for flexibility.

Tube Laser Operator

BenCo Technology

Jul 2015 - Present (8 years 10 months)

The day to day task include but not limited to gathering metal tubing ranging from various dimensions, length, and thicknesses. This can be round, square, angle stainless, aluminum or mild steel. Uploading nested files that encapsulate the customer specifications for their parts. I am there to make sure that we provide the best cut quality in a timely matter. Other duties include filling paperwork to be handed over to the shipping department, performing preventable maintenance and performing repairs when applicable. On a less serious note, this job is very physically demanding and I have a toned body because of it... no gym needed.

Junior Front-End Web Developer

CarlowSEO

Apr 2015 - Jul 2015 (4 months)

Using Shopify, an ecommerce solution that allows small businesses to sell and distribute their good and or services.

Wash Bay Technician

H. R. Ewell

Nov 2009 - Jun 2015 (5 years 8 months)

Prepared (dirty) food grade trailers that needed to be wash while implementing the best time management skills that I have, to reduce the time spent while preparing the trailers for their wash. HR Ewell uses a system automation, clean-in-place program (CIP) that now runs on a Windows 7 IOS. They previously used Windows XP. If and when their program would experience technical difficulties, I would make suggestions, and or fix it myself with the knowledge I already know and give my manager a detailed report on my findings. While the trailers would be washing they required myself and others to constantly monitor the display screen for any irregularities and monitor any alarms that may go off at

any time. We will sometimes have to manually override system components to ensure that our washes meet the requirements and satisfaction of our customers, FSIS and the FDA. When asked to, I have received supervisor responsibilities, making changes to dispatch orders, and to this day I have only had less then 10:+600 trailers not meet customer requirements many due to uncontrollable insistence's under my watch.

Education

ITT Technical Institute - Harrisburg, PA

Associate in Applied Science, Software Applications and Programming

2012 - 2014

Build simple applications, using various programming languages such as, C++, Java, HTML, and Vb

Lancaster Career and Technology Center - Brownstown, PA
